Profile

I am a **full-stack web developer** with skills in both front-end and back-end development. I have experience building modern and responsive websites using **HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, React, and Ant Design**. On the backend, I work with **Node.js, Express.js, and MongoDB** to create fast and efficient web applications. As a student of **Information Science**, I also have a **basic understanding of networking**, which helps me build better and more secure web applications.

Education

01/2010 – 04/2015 Sirajganj, Bangladesh	Secondary School Certificate (SSC) <i>B.L. Government High School</i> Completed SSC in the Science stream with an outstanding GPA of 5.00, gaining a strong foundation in Mathematics, Physics, Chemistry, and Biology
06/2015 – 08/2017 Sirajganj, Bangladesh	Higher Secondary Certificate (HSC) <i>Sirajganj Government College</i> Completed HSC in the Science stream with an excellent GPA of 5.00 , strengthening my knowledge in Mathematics, Physics, Chemistry, and ICT
02/2019 – 08/2025 Rajshahi, Bangladesh	Bachelor of Science in Information and Communication Engineering <i>University of Rajshahi</i> Completed a BSc in Information and Communication Engineering , gaining knowledge in computer networks, programming, databases, and web development . Developed strong problem-solving skills and a solid understanding of software development, networking, and system security , which support my journey as a full-stack web developer

Projects

04/2025 – 04/2025

Lifeline - A Blogging Platform

Lifeline is a full-stack blogging application where users can share posts, read content, and manage their profiles. Built with the MERN stack.

LifeLine is a blogging platform where users can share their thoughts, stories, and insights. It features user authentication, profile management, and organized content categories for an engaging reading and writing experience.

03/2025 – 03/2025

AuthShield

This project implements JWT (JSON Web Token) authentication in a Node.js application, providing secure user registration, login, and protected routes. It uses bcrypt for password hashing, express for routing, and middleware to verify tokens for accessing restricted endpoints.
